Talkgroup ID	Description
1	Local, not linked. Ideal for single-site communications.
302	Canada-Wide
505	Australia-Wide. Cross-linked to DMR (Brandmeister 50599) and Fusion.
1200	Florida Statewide.
1201	West Central Florida.
2700	Brevard County (Florida) Local.
9000	Connecticut Extended. Bridge between Icom and Kenwood NXCore NXDN networks.
10400	Pacific Regional.
10922	CQ-UK. Cross-mode reflector.
20000	Deutsch. Multi-mode support. Traffic in both English and German may be present.
25000	Massachusetts Statewide.
31088	Colorado HD (Hotspot Discussion). Multi-mode support.
31171	Illinois Link. Link to NXDN, Fusion, and DMR.
31188	Multi-Mode link to a network of repeaters in Southern Indiana. Info at w9win.net.
31137	Kingsland Link (GA). Multi-mode support. Links to Brandmeister 311307 on DMR.
31374	Carolina Link. Multi-mode support.
31444	Rhode Island Link. XLX Reflector with multi-mode support.
31648	XLX Reflector providing cross-mode connectivity to DMR (Brandmeister 31648), Fusion, and P25.
50525	XLX Reflector providing cross-mode connectivity to DMR (Brandmeister 50525)
65000	Worldwide
65208	France. Links to multiple modes (DMR Brandmeister 20811). Traffic in both English and French may be present.

Note to Users: Please be mindful that static talkgroups will activate, and potentially tie-up, many repeaters in the network. To minimize the wear and tear on terrestrial repeaters, and to ensure these groups are available for users in the service area, please limit your use of these groups to QSOs where at least one participant is in the covered area. For out-of-area QSOs, or for extended QSO's ("Rag Chews"), please consider using one of the XLX Reflector talkgroups. Individual repeater owners reserve the right to add or remove talkgroups at any time, without notice.

In times of local emergency, severe weather, etc., repeaters may be temporarily disconnected from the network, in whole or part, for the duration of the event.
